

'Fire Safety for All' Conference

Venue & Date: Madrid, 23-3-2017

If there is a FIRE ... What should I do ? How do I get out of here ? Where is there a safe place ?

If I can not go down the stairs ... if the lift/elevator can not be used in a fire ... if I can not hear the alarm or communicate with the emergency services ... if I do not know or cannot follow the evacuation routes ... if I do not understand the signage or the instructions that are given ... if I feel vulnerable, confused and helpless in this stressful situation ...

How Can I Be Safe ?

These are some of the questions that many people ask themselves in their homes, workplaces, leisure and relationship places, etc. They fear being trapped in buildings where no thought at all has been given to their needs.

Those responsible for the design, construction, management and safety of buildings are increasingly aware of the need to find solutions that assure the safety of ALL occupants of a building in the case of a fire emergency.

CEAPAT, FAMMA and COITIN are responding to these serious concerns. For this reason, they have organized a conference to present the state-of-the-art in Spain, as well as some good international practice and experiences.

'Fire Safety for All' Conference

- 09,00- 09,30 **Welcome**
- 09,30-10,00 **Official Opening**
- 10,00-10,45 **Human Behaviour in Case of Fire. User Needs & Fire Patterns**
